Text

Transkribus Document – Mets (Metadata Encoding and Transmission Standard)

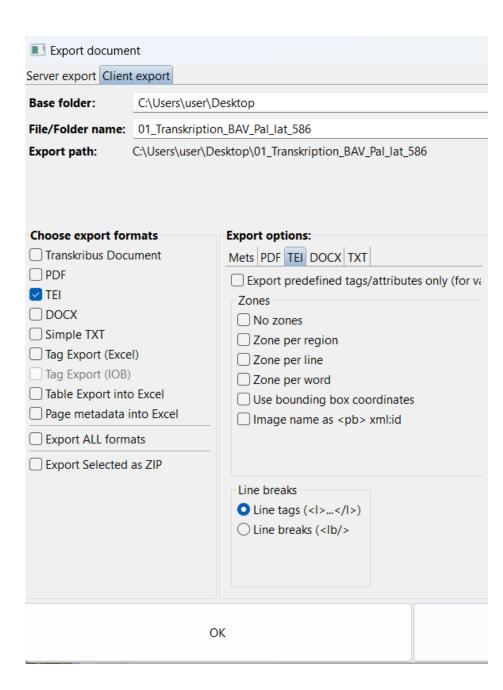

- Page
- ALTO (Analyzed Layout and Text Object)
- Image
- Text files (from each page)
- Structural elements to Mets (metadata.xml)

Mets https://www.loc.gov/standards/mets/ ALTO https://www.loc.gov/standards/alto/

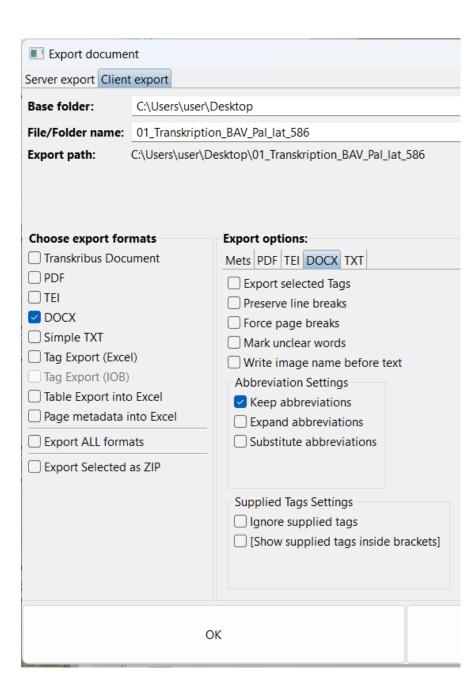

PDF

- Images plus text layer (invisible text layer for searching)
- Images only
- Extra Text pages
- Highlight tags
- Highlight articles
- PDF/A (long-term preservation)

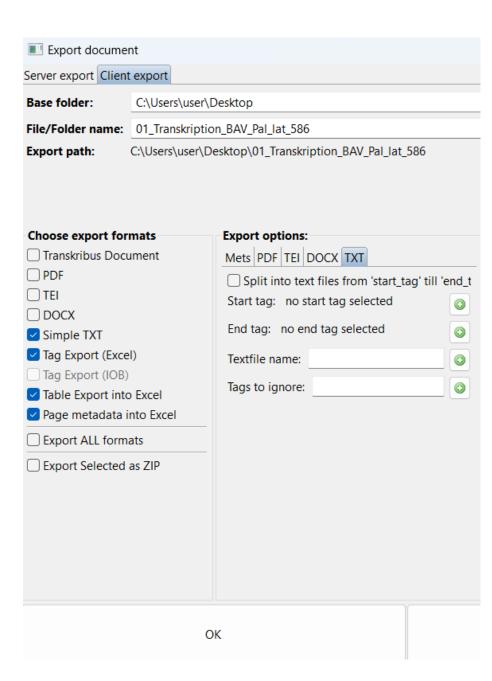

TEI (Text Encoding Initiative)

- No zones (text only, no layout information)
- Zone per region (e.g., paragraphs or sections).
- Zone per line
- Zone per word
- Use bounding box coordinates (coordinates for zones, lines, or words.)
- Image name as <pb> xml:id (page break identifier)

DOCX

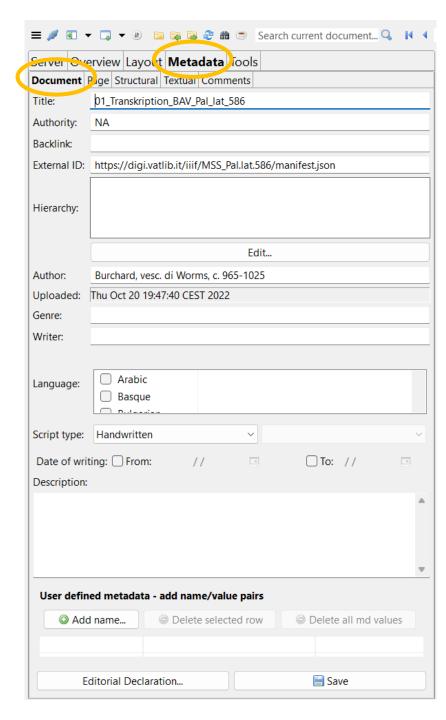

- Selected Tags
- Preserve line breaks
- Force page breaks
- Mark unclear words
- Write image name before text

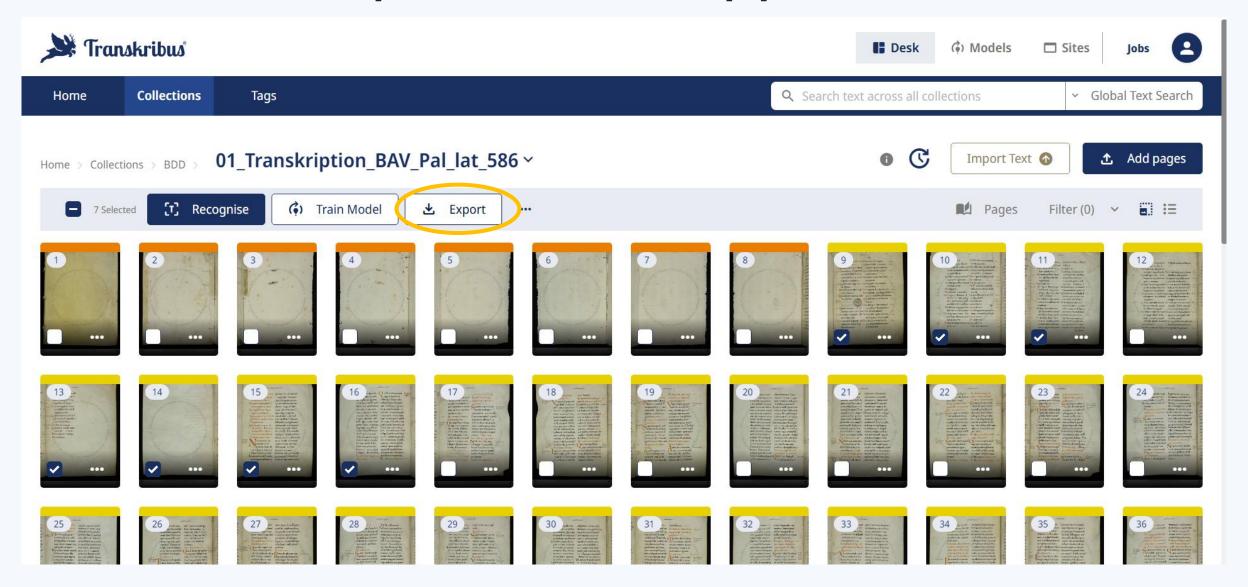

OTHER FORMATS

- Simple TXT
- Tag Export (Excel)
- Table Export into Excel
- Page metadata into Excel

Textual Analysis and Research Applications

- Text search and linguistic analysis (concordance analysis, pattern recognition)
- Philological and historical research (textual variation, annotation for digital edition, comparative analysis)
- Text mining and computational analysis (pattern detection, sentiment analysis, semantic studies)

Data visualisation and Presentation

- Geospatial Analysis: (QGIS).
- Creating Visuals from Textual Data (word clouds, frequency graphs)
- Graphs and network analysis (connections between people, events, or concepts)

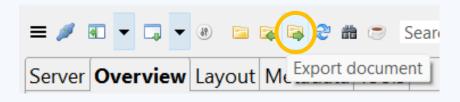

Machine Learning and Al Applications

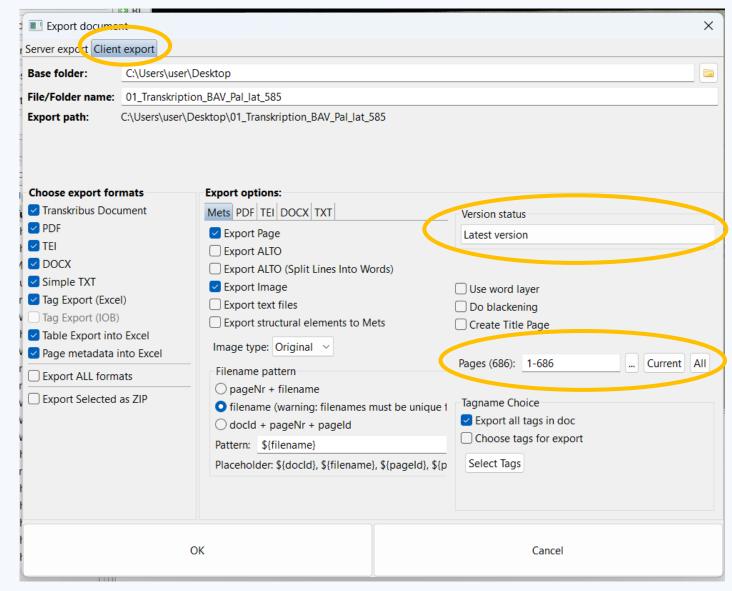

- Natural Language Processing (NLP) (linguistic and semantic analysis)
- Training recognition models or improving recognition
- Predictive analysis (identify patterns or make predictions)

LAB session

Step 1: Export your transcription

- PAGE XML: For advanced analysis, semantic annotation, and ground-truth data creation.
- ALTO XML: For layout-specific applications or digital repositories.
- PDF: To create a readable, searchable document.
- TEI: For structured, scholarly analysis.
- DOCX: For collaborative editing or sharing.
- Simple TXT: For text editing.
- Tag Export into Excel: For analysing or editing annotated tags in tabular form.
- Table into Excel: For extracting and working with structured table data.
- Metadata into Excel: For reviewing, managing, or sharing document metadata in a spreadsheet format.

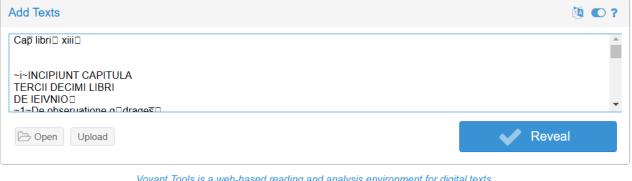

LAB session: optional

Step 2: Export your transcription in simple TXT and open Voyant Tools

https://voyant-tools.org/

Paste the text in the box or upload the TXT document. Click "Reveal".

Voyant Tools is a web-based reading and analysis environment for digital texts.

Announcing the Voyant Consortium. Register to be a member here.

LAB session: optional

Step 3: Present what you found out about the text you transcribed.
